UNLIMITED POSSIBILITIES

Andersen.

Introducing Windows from A New Point of View.

THE ANDERSEN® ARCHITECTURAL COLLECTION

The Architectural Collection is an industry-leading, innovative approach to windows and doors that's based not on the type of window or door, but rather on the style of home you want to create.

Never before has it been so easy to dream, easy to understand your options and easy to select the windows and doors that fit not just your home, but also your vision.

The Architectural Collection. Only from Andersen.

E-Series/Eagle® rectangular and trapezoidal picture windows and awning windows.

E-Series/Eagle®

WINDOWS AND DOORS

Windows to Your Imagination. Doors to Your World.

Custom colors. Unlimited design options. Dynamic sizes and shapes. With E-Series/Eagle® windows and doors from the Andersen® Architectural Collection, the home you've always imagined can be more than a dream. More than a vision. It can be reality.

E-Series/Eagle® radius and rectangular picture windows. Traditional divided light pattern.

Every E-Series/Eagle® product is made to your exact specifications, giving you unmatched freedom. You can even work directly with a window specialist to get the product you want with the performance you need.

The inspiration for your home can come from anywhere. The ability to fulfill it comes from E-Series/Eagle windows and doors.

Unlimited Possibilities.

In the following pages, you'll find a small sampling of what's possible with E-Series/Eagle® products. No matter what you have in mind, E-Series/Eagle windows and doors can help you create your personal vision of home.

E-Series/Eagle® Windows

DOUBLE-HUNG WINDOWS

A double-hung window has two vertically sliding sash (glass panels) in a single frame. Double-hung windows lift open while remaining flush with the wall, making them ideal around patios, decks and walkways. Both top and bottom sash tilt in for easy cleaning.

CASEMENT WINDOWS

Casement windows are hinged windows that open outward to the right or to the left. They're common above kitchen sinks and give you the flexibility to group in stunning combinations. French casement windows feature side-by-side left- and right-opening sash with no center mullion bar. Push-out casement windows feature a manual lock handle to push open the window.

AWNING WINDOWS

Awning windows are hinged at the top and open outward. They catch breezes from the left or right and are often used above, below or alongside stationary windows. Push-out awning windows feature a manual lock handle to push open the window.

You want your home's windows and doors to reflect your inspiration, but you also want them to fit your lifestyle. With E-Series/Eagle® products, you have the choices you need for a beautiful blend of both form and function.

E-Series/Eagle® Doors

SLIDING DOORS

Sliding doors have at least one door panel that slides smoothly past another door panel. Choose from our sliding patio or sliding French door styles. Both are available with two, three or four panels.

HINGED INSWING FRENCH DOORS

Available with one or two panels, with at least one panel that swings inward, which saves space on balconies, small decks and patios.

HINGED OUTSWING FRENCH DOORS

Available with one or two panels, with at least one functioning panel that swings outward, allowing for more usable space inside a room.

BAY & BOW WINDOWS

Bay and bow windows are window combinations that project outward from a home. E-Series/Eagle® bay and bow windows create a focal point that is visually striking.

SLIDE-BY WINDOWS

Slide-by windows feature two or three sash, with at least one of the sash sliding past the others. They provide the advantages of double-hung windows with a more contemporary look.

SPECIALTY WINDOWS

Specialty windows are stationary (non-opening) windows characterized by their special shapes, including curves and dramatic angles. They can make a signature statement in your home or provide a delicate lighting accent.

TRANSOMS & SIDELIGHTS

Transom windows go above a door while sidelights flank one or both sides of the door. Alone or combined, they can turn your entry into a focal point while letting more natural light into your home's entryway. Many options are available, including a venting sidelight that allows fresh air into your home even when keeping the door open isn't an option.

E-Series/Eagle® hinged outswing double door with sidelight. Traditional divided light pattern.

Unlimited Exteriors

CUSTOM COLORS

E-Series/Eagle® inswing door with radius and rectangular picture windows. Traditional divided light pattern on door and radius windows.

Do You Dream in Color?

Color enhances your design, and we believe it shouldn't have to cost more. Start with one of our 50 exterior color options, an industry-leading palette available at no additional cost. Add to that our two-, three- and four-tone exteriors, and set your E-Series/Eagle® windows and doors apart from the rest.

Whether your inspiration comes from an autumn leaf, a river-washed stone, a glass of wine or even a classic car, E-Series/Eagle® products bring it to life with their custom capabilities. Additionally, for an added look of distinction, consider one of our seven spectacular anodized finishes.

MULTI-TONE EXTERIORS

Create two-, three- and four-tone color combinations by mixing and matching up to four exterior finish options.

EXTERIOR TRIM OPTIONS

Featuring intricately defined detail made possible through the use of extruded aluminum, our exterior trim options extend outward from the window or door frame, casting a shadow line consistent with true historical applications. Choose from a selection of flat and profiled casings, brickmold casings and sill nosing. Or design your own custom trim profile. Match or contrast the trim with your window and door in any of our 50 exterior colors, custom colors and anodized finishes.

A Range of Interiors. Including Yours.

Beautiful wood can turn any interior into a conversation piece. E-Series/Eagle® products feature the natural beauty of pine or mixed grain fir as standard options. Additional wood species are also available, offering a full range of character. Each wood species can be finished in one of eight interior stains, two basecoat colors or clear polyurethane. For complete design freedom, you can also specify virtually any species of wood or have us custom match a finish for you.

E-Series/Eagle® double-hung windows. Traditional divided light pattern on upper sash.

DISTINCTIVE WOOD SELECTIONS

Our distinctive woods add uncommon flair to any room. Each has its own character, grain and staining capabilities, so you can select one that makes your windows stand out or one that blends seamlessly with your interior décor.

• GLASS •

A Range of Glass Types for a Range of Needs.

For both beauty and performance, E-Series/Eagle® products extend your design freedom to glass and divided lights. We offer a multitude of glass options, including High-Performance™ Low-E4® glass as our standard option. Our exclusive HarborMaster® systems for severe weather are perfect for coastal conditions.* In addition, you can choose from stunning decorative glass collections and flexible divided light options, or design your own for just the right look.

HIGH-PERFORMANCE™ LOW-E4® GLASS

Standard on all E-Series/Eagle® products. It's up to 40% more energy efficient in winter and up to 57% more efficient in summer.**

HIGH-PERFORMANCE™ LOW-E4® SMARTSUN™ GLASS

It gives you the benefits of Low-E4® glass, plus it helps shield your home from the sun's heat and filters out 95% of harmful UV rays while letting sunlight shine through.

HIGH-PERFORMANCE™ LOW-E 240

It's tinted for maximum protection from the effects of intense sunlight while providing all the benefits of Low-E4® glass.

Additional glass options are also available. Visit eaglewindow.com or see your local dealer.

PERFORMANCE COMPARISON OF E-SERIES/EAGLE GLASS OPTIONS

GLASS	ENERGY		LIGHT	
	U-FACTOR	SOLAR HEAT GAIN COEFFICIENT	VISIBLE LIGHT TRANSMITTANCE	UV PROTECTION
	How well a product prevents heat from escaping.	How well a product blocks heat caused by sunlight.	How much visible light comes through a product.	How well a product blocks ultraviolet rays.

i81 COATED GLASS

Innovative coating applied to the room side glass surface of a dual-pane unit provides improved U-Factor values by reflecting escaping heat back into a room. When combined with our other glass options, the i81 glass coating helps many products meet U.S. ENERGY STAR® Version 5.0 requirements in the Northern Zone.

TRIPLE-INSULATED GLASS

Three panes of glass combine with either argon or air and Low-E coatings to provide enhanced energy performance. Adding triple-insulated glass to one of our windows or doors produces a lower U-Factor than using regular dual-pane glass.

PASSIVESUN™ GLASS

Great solution for colder climate zones where higher heat gain is desired. It allows a higher amount of the winter sun's heat to pass into the home as compared to Low-E4® glass, making it ideal for passive solar applications.

*See your local code official for building code requirements in your area.

**Winter and summer values are based on comparison of E-Series/Eagle® Talon® 3866 double-hung window U-Factor to the U-Factor for clear dual-pane glass nonmetal frame default values from the 2006, 2009 and 2012 International Energy Conservation Code "Glazed Fenestration" Default Tables.

ADDITIONAL GLASS OPTIONS

HARBORMASTER®

IMPACT-RESISTANT PRODUCT SYSTEMS

Designed for impact resistance, these systems use monolithic or insulated laminated glass in combination with structural enhancements to meet or exceed the stringent code requirements of ASTM and TAS testing protocols.*

DECORATIVE AND SPECIALTY GLASS

Select from our decorative glass collections found online at eaglewindow.com or combine beveled, frosted, grooved, colored or textured glass with three coming options to create your own design. Specialty glass includes tinted glass, spandrel glass and Mapes panels as well as rain, reeded and obscure glass options.

DESIGN YOUR OWN DIVIDED LIGHTS

We offer a variety of divided light patterns to choose from or design your own with varying lines, curves and shapes to create a truly unique pattern.

TruScene® Insect Screen

Conventional Insect Screen

Screen out the Insects, Not the View.

E-Series/Eagle® insect screens let the beauty of the outdoors in, while keeping even small insects out. Choose from a wide selection of insect screen styles, including options that blend seamlessly with your window.

INSECT SCREEN OPTIONS

TRUSCENE® INSECT SCREEN*

TruScene® insect window screens are made with a micro-fine stainless steel mesh that offers 50% more clarity than our conventional aluminum mesh screens.

TruScene insect screens let in more fresh air and sunlight and keep small insects out.

All TruScene® comparisons are made to a conventional E-Series/Eagle® aluminum insect screen.

WOOD-VENEERED INSECT SCREEN

E-Series/Eagle® interior window insect screens can be veneered in one of our beautiful wood selections, allowing the frame to blend seamlessly into your window.

CONCEALED INSECT SCREEN FOR DOORS**

This insect screen is built with an innovative color-matched housing that hides the insect screen when not in use. It's there when you need it and gone when you don't.

RETRACTABLE INSECT SCREEN FOR WINDOWS

Made specifically for casement and awning windows, this insect screen is a sleek addition to any home. In place, the insect screen keeps insects out. When retracted, it provides a beautiful clear view.

Additional insect screen options are also available. Visit eaglewindow.com or see your local dealer.

*TruScene® wood-veneered insect screens utilize a different frame profile than other E-Series/Eagle® wood-veneered insect screens.

**Concealed insect screens are available on inswing, outswing and sliding doors. See your local dealer for details.

Privacy Options You Simply Have to See.

E-Series/Eagle® blinds or shades between the glass provide the ultimate in practicality for your home. Our systems not only protect the blinds or shades, they also greatly reduce your cleaning time. Which means you have both privacy and convenience at your fingertips.

BETWEEN-GLASS BLINDS

Between-glass blinds can be added to many of our doors and rectangular picture windows. Choose one of four popular colored blinds that are placed between two panes of glass. Control both tilt and raise* conveniently with a single cord.

Tilt, raise and lower with one control cord.*

SYSTEM 3 BLINDS AND SHADES

System 3 Shades

System 3 Blinds

System 3 blinds and shades create a triple-glazed window that provides greater energy efficiency and protects your blind or shade from damage. They are perfect for casement, awning and picture windows and hinged doors. Frames are available in tan, gold, white or optional wood veneer.

A Sense of Security

With VeriLock™ Sensors, Security Is the First Comfort of Home.

VeriLock™ integrated security sensors are an innovative technology that integrates wireless security sensors into select E-Series/Eagle® windows and doors. These exclusive sensors are unique as they detect whether the windows and doors are locked or unlocked* — a feature no other sensors can provide.

PEACE OF MIND AT A GLANCE

Most security sensors can only detect whether a window or door is open or closed. VeriLock™ sensors not only do that, they also detect whether your windows and doors are locked or unlocked. With VeriLock™ sensors and a quick glance at your security system keypad, you'll know if you've secured your home for the day or night.

NO VISIBLE WIRES OR SENSORS

VeriLock™ sensors are built directly into the design of E-Series/Eagle® windows and doors, eliminating the need for unsightly wires or visible sensors. With VeriLock™ sensors, there's nothing to detract from the beauty of your new E-Series/Eagle® windows and doors.

PRESERVE YOUR WARRANTY

The installation of wires and sensors can actually void most window and door warranties. VeriLock™ sensors are built into your windows and doors at the factory, so your window and door limited warranty remains intact.

MAXIMIZE ENERGY EFFICIENCY

Air escapes through windows and doors that are left opened or even just unlocked. With VeriLock™ sensors you can easily verify that your windows and doors are providing maximum energy efficiency.

AVAILABLE WITH MOST E-SERIES/EAGLE® PRODUCTS INCLUDING:

- Casement and awning windows
- Double-hung windows
- Inswing and outswing, single- and double-doors
- Sliding doors

See your local dealer for product-specific details.

In collaboration with
Honeywell

E-Series/Eagle® Windows and Doors

Engineered for Performance, Durability and You.

Most E-Series/Eagle® products meet or exceed ENERGY STAR® criteria, which can reduce your energy bills up to 15% while helping to protect the environment*.

BUILT STRONG.

E-Series/Eagle® windows and doors are made with heavy-gauge, extruded aluminum-clad wood sash and frames. Our thick cladding offers greater structural capabilities than thinner, roll-form aluminum, while providing a superior exterior finish that resists the elements of inclement weather, abrasion and impact.**

LOW-MAINTENANCE EXTERIORS.

Baked-on silicone polyester enamel exteriors offer virtually maintenance-free performance and durability. They're warranted for 10 years against chalking and color change and for 20 years against cracking, checking, peeling, flaking, blistering and loss of adhesion.**

PROTECTION FOR COASTAL AREAS.

E-Series/Eagle® windows and doors with HarborMaster® impact-resistant systems meet building code requirements in many Gulf and Atlantic coast states.†

Most other window and door warranties end when a home is sold, but our coverage — 20 years on glass, 10 years on nonglass parts — transfers from each owner to the next. And because it is not prorated, the coverage offers full benefits, year after year, owner after owner.** So it adds real value when you decide to sell your home.

ENERGY-SAVING GLASS FOR ANY CLIMATE.

We have the glass you need to get the performance you want, including a variety of Low-E glass options to help you control heating and cooling costs in any climate, plus SmartSun™ glass options that help meet ENERGY STAR® qualifications in most climate zones.

DESIGN VERSATILITY.

Extruded aluminum's strength and versatility allow us to offer beautiful made-to-order design solutions for practically any combination of shapes and styles you can imagine. And because our exterior frame, sash and trim components utilize extruded aluminum, our products feature clean, architecturally accurate lines and details to complement your home's style.
