Introducing Windows from A New Point of View.

THE ANDERSEN® ARCHITECTURAL COLLECTION

The Architectural Collection is an industry-leading, innovative approach to windows and doors that’s based not on the type of window or door, but rather on the style of home you want to create.

Never before has it been so easy to dream, easy to understand your options and easy to select the windows and doors that fit not just your home, but also your vision.

The Architectural Collection. Only from Andersen.
A-Series
WINDOWS AND PATIO DOORS

Authentic to Style. Authentic to You.

Your home’s architectural style says a lot about you. A-Series products from the Andersen® Architectural Collection allow it to speak with authenticity and clarity.

The windows and doors in this series were designed in conjunction with leading architects to ensure each is authentic to the architectural style you select. Whether it’s a stately Queen Anne, a bold Modernist design or anything in between, you can create it with A-Series products. And you can do so knowing you’re choosing the best-performing, most energy-efficient windows and doors Andersen has ever offered.

Interior finishes: A-Series windows and doors offer six different factory stains, two paint choices or a primed finish to complement any look. Page 21.

Exterior colors: With 11 different colors, you can mix and match sash, frame and trim to achieve hundreds of combinations. Page 18.
In the following pages, you’ll see a range of architectural styles and how easily you can create them with Andersen® A-Series products.

While we’ve chosen the quintessential offerings for each style, we encourage you to explore our entire palette of options and accessories to make your home your own.
Tudor

Tudor homes are loosely based on a variety of early English building traditions ranging from simple folk houses to late medieval palaces. Asymmetry is preferred in the Tudor style, allowing standard windows and bay windows to be oriented as desired for optimal views.

SIMILAR STYLES: Queen Anne, Stick Style, Victorian

COMMON FEATURES:
- Casement windows, bay or bow windows and transom windows are most common
- Windows are typically tall and narrow with many small panes and are often grouped together
- Features rectangular or diamond-shaped window grilles — often together in the same house
- Window colors tend to be deep, warm, dark wood tones
- Window frame, sash and exterior trim are typically one color

A-SERIES STYLE RECOMMENDATIONS

For additional choices, see pages 18–33.

Printing limitations prevent exact duplication of colors and replication of finishes. Please see your Andersen dealer for actual color and finish samples.
French Eclectic

French Eclectic style is not one style, but a range of styles inspired by French architecture, finding its way to America via soldiers returning from World War I. Although its roots are in the south of France, French Eclectic is a very American interpretation of the French domestic vernacular.

**COMMON FEATURES:**

- Casement windows are favored, but double-hung windows are acceptable.
- A variety of window types are often used together to create a picturesque look.
- Windows are usually rectangular and vertically oriented with multiple rectangular or sometimes diamond grilles.
- Window colors are white or an earthy range of browns.
- Window frame and sash are typically one color, with exterior trim in a contrasting color or in the same color.

**A-SERIES STYLE RECOMMENDATIONS**

For additional choices, see pages 18–33.

**EXTERIOR COLOR**

- Terratone®/White

**HARDWARE**

- Window: Traditional Folding Handle
- Patio Door: Encino®
- Finish: Distressed Bronze

**ENTRANCEWAY**

- Door: 632

Printing limitations prevent exact duplication of colors and replication of finishes. Please see your Andersen dealer for actual color and finish samples.
Spanish Colonial

The Spanish Colonial style gained widespread popularity in the United States in the first part of the 1900s, primarily in the south and southwest where overheating was a problem much of the year. Thick walls and deep, shaded loggias proved to be an ideal response to the climate and were well-suited to incorporate the architectural details from many eras of Spanish and Mexican homes.

COMMON FEATURES:
- Arched doors, windows and porch entrances — typically half-round shape
- Windows are typically tall and narrow with a rectangular grille pattern
- Casement windows are most common, but double-hung windows are also used
- Doors opening onto loggias, balconies or patios are most commonly French doors
- Frame, sash and brick mould are usually darker in color and contrast with lighter exterior walls — white frame, sash and brick mould also used
- Decorative ironwork often highlights windows and balconies

Queen Anne

The Queen Anne style emerged within the Victorian period between 1880 and 1910. It uses wall surfaces as decorative elements. This is accomplished by avoiding flat walls through the use of gables, bay windows, towers, overhangs, wall projections and several different cladding materials.

COMMON FEATURES:
- Double-hung windows are common, often with upper sash divided into geometric shapes and lower sash without grilles
- Less ornamental grille options are one-over-one and two-over-two patterns
- Wide use of transom windows as part of bay windows and over front windows and doors
- Grilles with rectangles, diamonds and circles are common in front windows, transoms and gables
- Art glass in front windows, accent windows and bay windows
- Exterior colors frequently reflect colors used in art glass

- Art Glass: Queen Anne Design

For additional choices, see pages 18–33.

Printing limitations prevent exact duplication of colors and replication of finishes. Please see your Andersen dealer for actual color and finish samples.
American Farmhouse

While this style evolved from New England Colonial houses, it is often associated with the Midwest, where it was popular when that region was being settled. Often fairly basic, but when stylistic elements were added, they tended to be borrowed from the Victorian style.

**COMMON FEATURES:**
- Tall double-hung windows are most common with a height typically 2 – 2½ times the width
- Early farmhouses had no accent windows; later versions used ovals, circles and archtop windows in stair landings, in entryways and below gables
- Historically, more affluent farmhouses often used bay windows and window groupings
- Exterior colors include earth tones as well as whites and pastels
- Two-over-two window grille pattern is most common

**SIMILAR STYLES:**

Georgian/Federal

In the late 1700s, Georgian style marked a time of reformation of the American house from being simply utilitarian and functional to one that was stylized, stately, spacious and comfortable. Its roots were in Classical Roman Architecture. Federal style was a continuation of this movement, but was identifiable by greater attenuation and refinement of many details.

COMMON FEATURES:

- Main windows are almost exclusively vertically proportioned double-hung windows with multiple divided lights
- Window pane size evolved from smaller to larger, thus 12-over-12 grille pattern is more common in Georgian style, whereas six-over-six is typical of Federal style
- Front door often features a transom window and sidelights
- White window frames and trim were most popular during the Georgian era, while recent examples use a range of light tones
- Window sash and trim usually match, although slight contrast is also acceptable

Craftsman Bungalow

Craftsman-style houses emerged from the traditions of Arts & Crafts designs found throughout the country that promoted a simple decorative expression of structural elements. The bungalow is one of the most common house styles that emerged from that movement.

**COMMON FEATURES:**
- Double-hung windows are predominant, but casement windows are also common
- Grilles are used in upper sash of double-hung windows, creating vertical proportions
- Exterior window trim is usually 4½-inch-wide flat trim with sill nose
- Window frame and sash are often one color and the exterior trim is a contrasting color
- Exterior window colors tend to be in the warm, earthy range of browns, greens, burgundies and yellows

**A-SERIES STYLE RECOMMENDATIONS**

For additional choices, see pages 18–33.

- Window: Traditional Folding Handle
- Patio Door: Albany
- Finish: Black

**ENTRANCEWAY**
- Door: 404
- Sidelight: 401

For more information, please visit andersenwindows.com/entranceways.

**ART GLASS**
- Arts & Crafts Design

See pages 28–29 for additional art glass options.
The Prairie style is considered the first architectural style of American origin. It features bold, clean lines and came about as a direct reaction to the ornate, compartmentalized Victorian style of the late 1800s and early 1900s. The core design ideas of this style are most widely attributed to architect Frank Lloyd Wright.

**COMMON FEATURES:**
- Casement windows are heavily favored, often either with art glass or the Prairie grille pattern, which are both shown in the windows to the right
- Vertically proportioned windows are almost always mullioned together to create a horizontal design element
- Single window units are rare
- Transom windows are commonly used above doorways and prominent window groupings
- Common exterior window and trim colors are earthy browns and rusts, autumnal reds and golds, and leafy greens

**SIMILAR STYLES:**
- Arts & Crafts
- Mission
- Modern

**A-SERIES STYLE RECOMMENDATIONS**

Ranch

Ranch houses are typically unpretentious, long, narrow and low to the ground. They became popular among World War II veterans and spread across the country, resulting in several variations. Contemporary Ranches are simple and have hipped or gabled roofs and deep overhangs. International-style Ranch houses have flat roofs and more glass.

COMMON FEATURES:
- Large expanses of glass and horizontal windows
- Gliding patio doors
- A large picture window flanked by narrow casements or double-hung windows is a quintessential grouping in Ranch style
- Front door is not emphasized
- Grilles are typically horizontal or nonexistent
- Casement windows are most common, but double-hung windows are also acceptable

SIMILAR STYLES:
Modern
Prairie

Finish: White

ENTRANCEWAY
Door 196

For more information, please visit andersenwindows.com/entranceways.
**Modern**

Simple geometry, clean lines and the overt abandonment of architectural ornamentation characterize Modernism. The style deliberately embraces the notions of industrialism and machine-made products as a way to improve life through efficient and affordable construction. Elements of historic styles are generally absent.

---

**COMMON FEATURES:**
- Windows, often casements or awnings, set horizontally in long “ribbons”
- Doors and windows align to give a clean look to the exterior
- Grilles are nonexistent
- Color palette is most commonly monochromatic with whites, blacks and grays, often with a strategic accent color such as natural wood

---

**SIMILAR STYLES:**
- International Ranch Shed

When choosing windows and doors, you’ll want to consider the style of the home you’d like to create as well as how you’d like the windows and doors to operate. With Andersen® A-Series products, you have the choices you need for a beautiful blend of both form and function.

A-Series Windows

**DOUBLE-HUNG WINDOWS**
A double-hung window has two vertically sliding sash (glass panels) in a single frame. Double-hung windows lift open while remaining flush with the wall, making them ideal around patios, decks and walkways. Both top and bottom sash tilt in for easy cleaning.

**CASEMENT WINDOWS**
Casement windows are hinged windows that open outward to the right or to the left. They’re common above kitchen sinks and give you the flexibility to group in stunning combinations.

A-Series Frenchwood® Patent Doors

**FRENCHWOOD® GLIDING PATIO DOORS**
These doors have at least one door panel that glides smoothly past another door panel to save room where you need it — inside or out. Available in two- and four-panel configurations.

**FRENCHWOOD® HINGED INSWING PATIO DOORS**
Hinged inswing patio doors open into the interior of your home, saving room for smaller exterior areas such as balconies, patios and decks. Available with one, two or three panels.
AWNING WINDOWS
Awning windows are hinged at the top and open outward. They catch breezes from the left or right and are often used above, below or alongside stationary windows.

SPECIALTY WINDOWS
Specialty windows are stationary (non-opening) windows characterized by their special shapes, including curves and dramatic angles. They can make a signature statement in your home or provide a delicate lighting accent.

VENTING & STATIONARY TRANSOM WINDOWS
Venting transom windows are hinged at the top and open outward. They are placed above doors to let light and fresh air into a room while adding style and curb appeal. Stationary transom windows share all the characteristics of venting transom windows but do not open for ventilation.

FRENCHWOOD® HINGED OUTSWING PATIO DOORS
With panels that open outward, these doors give you more usable space inside your home. Available with one or two panels.

TRANSOMS & SIDELIGHTS
Transom windows go above a door while sidelights flank one or both sides of the door. Alone or combined, they can turn your doorway into a focal point while letting more natural light into your home’s entryway.
Outer Beauty

The Exterior of Your Home Is the Face It Presents to the World.

With Andersen® A-Series windows and doors, you have the colors and exterior trim choices you need to make not only your windows, but your entire home look the way you’ve always envisioned.

Select any combination of colors shown here for your exterior frame, sash and trim.

A-Series double-hung, casement and transom windows and Frenchwood® outswing patio doors. Specified equal light grille pattern.
EXTERIOR TRIM THAT FITS WINDOWS, PATIO DOORS AND YOUR VISION.

Exterior trim adds a finishing touch to your windows and is often essential in achieving authentic architectural style. You can match the color of your windows or doors, or complement them with a different color. Durable A-Series exterior trim is low maintenance and never needs painting.
Inner Beauty

A-Series casement windows and Frenchwood® inswing patio door with sidelight and transom windows. Specified equal light grille pattern.
You Shouldn’t Need a Mirror to See Yourself in Your Home.

A-Series windows and doors provide you with a wide palette of wood species and finishes to help you bring your personality and taste to every room throughout your house.

INTERIOR WOOD SPECIES OPTIONS

A Menagerie of Glass

A-Series casement, picture and transom windows. Specified equal light grille pattern.
Best-in-Class Glass

Glass can affect energy efficiency more than any other part of a window or patio door — and not all glass performs the same. Some types of glass do a better job at insulating your home. Others provide greater clarity.

You can even choose glass to filter out specific kinds of light. Andersen offers one of the industry’s widest arrays of glass options, enabling you to find the right choice for your climate and your home.

**HIGH-PERFORMANCE™ LOW-E4® SMARTSUN® GLASS**
Offers our best overall thermal performance. It helps shield your home from the sun’s heat, it filters out 95% of harmful UV rays while letting sunlight shine through, plus it provides all the benefits of Low-E4® glass.

**HIGH-PERFORMANCE™ LOW-E4® GLASS**
Outstanding thermal performance for climates where both heating and cooling costs are a concern. It comes standard on all A-Series products and is up to 71% more energy efficient than ordinary dual-pane glass.*

**HIGH-PERFORMANCE™ LOW-E4® SUN GLASS**
Outstanding thermal performance in southern climates where less solar heat gain is desired. It’s tinted for maximum protection from the effects of intense sunlight while providing all the benefits of Low-E4® glass.

Additional glass options are also available. Visit andersenwindows.com or see your Andersen dealer.

## PERFORMANCE COMPARISON OF ANDERSEN® GLASS OPTIONS

**ENERGY**

Art glass changes appearance greatly based on lighting in its environment, making it beautiful to look at, yet difficult to represent accurately in print. Printing limitations prevent exact color replication. Andersen art glass panel patterns vary based on window size and shape.

Colors used in the Frank Lloyd Wright® Series will vary from photos and actual glass samples due to the unique character of the mouthblown glass. Colors in the Classic Series and Historic Series may also vary. Contact your Andersen dealer for more information.

Contact your Andersen dealer for samples or visit www.andersenwindows.com/artglass for detailed information about Andersen art glass.

Andersen® A-Series windows and patio doors offer a variety of grille types and grille patterns, making it easy to fit both your style and your home’s. For a signature look, we’ll work with you to create custom grille designs.

---

*Horizontal rails are also available in 7/8” and 1⅛” custom widths. **Any number of same-size rectangles across or down.
**GRILLE WIDTHS** *(ACTUAL SIZE SHOWN)*

Shown: Cross sections of grilles showing standard widths and profiles.

- ³⁄₄”
- ⁷⁄₈”
- ¹¹⁄₁₆”
- ²¹⁄₄”

Our ²¹⁄₄” wide grille can be positioned horizontally across the center of a casement window to simulate the look of a double-hung window.

**GRILLE CONFIGURATIONS**

**FULL DIVIDED LIGHT**

Give your window an authentic look with full divided light grilles that are permanently applied to the interior and exterior of your window with a spacer between the glass.

**SIMULATED DIVIDED LIGHT**

Simulated divided light offers permanent grilles on the exterior and interior with no spacer between the glass. We also offer permanent exterior grilles with removable interior grilles, available in natural wood or prefinished white.

**CONVENIENT CLEANING OPTIONS**

Removable interior grilles come off for easy cleaning. Andersen® Finelight™ grilles are installed between the glass panes and feature a contoured 1” or ¾” profile.
Optional insect screens are available for all A-Series products. Patio doors feature Andersen® fiberglass insect screens. For windows, choose aluminum insect screens, or TruScene® insect screens that provide a clearer view, help bring the outdoors into your home and are less noticeable from the street.

**TruScene INSECT SCREENS**
Made with a micro-fine stainless steel mesh that’s one-third the diameter of conventional insect screen wire, TruScene insect screens provide 50% more clarity than conventional Andersen® insect screens. They allow more fresh air and sunlight in, while keeping out small insects.

TruScene® insect screens are not available on patio doors. All comparisons are made to Andersen aluminum insect screens.
**FRAME OPTIONS**

All insect screens for casement, awning and venting transom windows are available in Stone, White or Gold Dust colored frames. Insect screens installed on the exterior of double-hung windows and patio doors have frames that match the exterior color of the unit.

**PREFINISHED WOOD FRAME OPTIONS**

Frames of TruScene® insect screens for casement, awning and transom windows are also available in three wood-veneered options and six stain colors to match the interior finish. Pine veneer frame with clear finish is shown.

**WINDOW INSECT SCREEN CONFIGURATIONS**

Full insect screens are available for all operating Andersen® A-Series windows. Our double-hung windows also give you the option of insect screens that cover only the lower sash.

**PATIO DOOR INSECT SCREEN CONFIGURATIONS**

A-Series products are also available with several styles of patio door insect screens, including a new top-hung gliding design for gliding and hinged doors.

Printing limitations prevent exact duplication of colors and replication of finishes. Please see your Andersen dealer for actual color and finish samples.

Most Andersen® products meet or exceed ENERGY STAR® criteria, which can reduce your energy bills up to 15% while helping to protect the environment.*

RIGOROUSLY TESTED.
A-Series products have been exposed to extremes, going from temperatures duplicating the cold of Alaska winters to the heat of Death Valley summers, three times a day, day after day. They came through it all beautifully.

NEVER NEEDS PAINTING.
Exteriors won't flake, rot, blister, peel, pit or corrode,** so they're virtually maintenance free. Plus they hold their original vibrant colors.**

KEEPS THE WEATHER OUT.
With their weather-resistant seals, A-Series windows and doors can stand up to eight inches of rain per hour and hurricane-force winds.† Double-hung windows feature a dual-bulb seal, and casement windows use “refrigerator” style gaskets to keep air and moisture out.

ENERGY-SAVING GLASS FOR ANY CLIMATE.
Andersen has the glass you need to get the performance you want, including a variety of Low-E glass options to help you control heating and cooling costs in any climate, plus SmartSun™ glass options that help meet ENERGY STAR® qualifications in all climate zones.

Savings may vary geographically and may vary based on other home insulating attributes.
**For a copy of the A-Series Limited Warranty visit andersenwindows.com/warranty.
