UPGRADE TO THERMASONIC CORE

Thermasonic Core INTERIOR DOORS

The Solid and Quiet Door

Thermasonic Core is a new line of doors that reduces the transfer of heat and noise, plus feels heavy and solid. It is a great door for bedrooms, bathrooms, laundry rooms or any room where you're trying to keep noise in or out. All Signature Series and Authentic Wood doors are available with our Thermasonic Core upgrade.

NOISE REDUCING

The use of noise reducing doors has become popular in both residential and commercial construction. Industry professionals now use high STC (Sound Transmission Class) doors to reduce the amount of airborne sound transmission.

ENERGY EFFICIENT

Using energy efficient products during home construction can save families about a third on their energy bill. Thermasonic Core doors meet higher standards for durability and heat transmission. When joined with the One Day Installation Process, they are fit down to 1/1,000th of an inch to existing door frames, reducing room-to-room heat transmission.
