Experience The C&L Ward Difference

Our services go beyond sound advice and the guaranteed lowest prices. As a family owned company with more than 45 years of expertise, we are committed to providing you with exceptional service and unsurpassed craftsmanship for you and your home. See for yourself the difference our standards for quality and service will make in your project experience.

We are Midwest-based and family-owned and operated for over 45 years. Fully licensed and insured with four showroom locations for your convenience.

Because of the length of time in business and our low complaint history, C&L Ward has been awarded the prestigious A+ Rating by the Better Business Bureau®.

Nationally recognized within the top 100 exterior remodeling firms amongst thousands of remodeling companies in the United States.

We are classified as a preferred installation company for our products. Our team is trained and certified by product manufacturers and industry associations.

Dedicated service & repair department that provides after-the-sale service on all C&L Ward project installations as well as servicing our other products when in need of repair.

Proud member of GuildQuality®, a customer satisfaction surveyor. We maintain a 95% Satisfaction Score in both Quality of Materials and Quality of Workmanship.

Why Therma-Tru® Doors

Uncompromising quality, inside and out.

#1 Among Building Pros

It's a brand you can trust. Why? Because year after year, building professionals rank Therma-Tru #1 – as the brand they prefer most – in entry doors.*

Experience & Know-How

Behind every Therma-Tru door stands decades of experience and technical know-how. Therma-Tru makes or recommends every aspect – from the glass to the hinges – to bring your home durability and reliability through the years.

Lifetime Limited Warranty

When you pay close attention to every detail that goes into a door, you can stand behind its parts longer than the rest. That's why your Therma-Tru fiberglass door system is backed with a lifetime limited warranty – the industry's most comprehensive warranty of its kind.

Open Your Door to a Job Well Done™

The Process is Simple...

From coordinating an initial appointment to settling your final balance, our staff is trained to make your replacement project as easy as 1-2-3!

1. In-Home Estimate

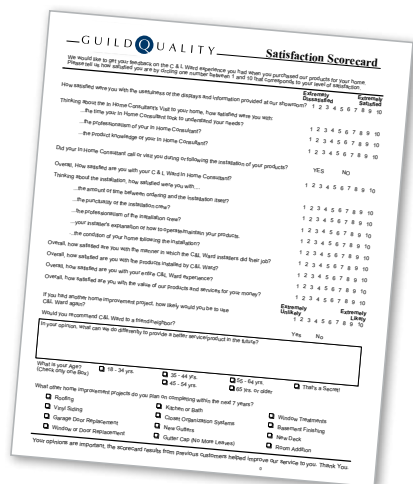

Let our knowledgeable professionals guide you through your home improvement project. We will assist you in determining what products meet your individual needs, style and budget, give you an in-depth product demonstration and present you with a written proposal that is valid for 30 days.

2. Professional Installation

When choosing C&L Ward®, you have selected skilled, trained, and certified home remodeling experts. Next, our Installation Professionals will arrive when scheduled to install the quality products you have purchased. We also clean up and dispose of old materials and debris.

3. Peace of Mind Guarantee

Now just sit back and enjoy the beauty, comfort and peace of mind that goes along with knowing you have the highest quality products installed by specialists! Our Peace of Mind Guarantee provides you with many years of worry-free beauty, comfort, and performance. We guarantee it!

When We Finish Your Installation, We've Actually Just Started

To make sure you are completely satisfied with our work, you will receive a Satisfaction Survey from Guild Quality. It will enable you to “Grade” our performance and your level of satisfaction with our company.

Service After The Sale

Long after your project is completed, C&L Ward is here to provide you with years of worry-free support. Our staff of in-house service technicians is ready to service your products should the need ever arise. Rest assured, help is just a phone call away.

For As Long As You Own Your Home

Peace of mind. Many companies promise it; however, few really deliver it. At C&L Ward, all of our installations are backed by a written workmanship guarantee. Should a problem ever arise due to the quality of our installation, C&L Ward will correct the problem at no cost to you, for as long as you own your home.

C&L Ward - A Job Well Done

Door Options

Choose from our many fiberglass doors to create an entry that complements the architectural style of your home. Options include wood-grained, stained or smooth, painted surfaces.

Classic-Craft® Premium Entryways

These premium fiberglass entryways come in four wood grains or a smooth surface that all rival the look of custom wood. Classic-Craft entry doors are rated a *Consumers Digest* Best Buy.

Architecturally correct for true classic beauty.

Doors designed to be architecturally correct, with proportions modeled after classic architectural principles, to create a more premium entryway.

Up to
25% wider
panels*

Classic-Craft Premium Door

Standard Fiberglass Door

Premium – right down to the edge.
A solid hardwood square edge delivers a genuine wood appearance.

Standard fiberglass bullnose edge.
The bullnose profile, typical of other fiberglass doors, detracts from the authentic wood look.

*Compared to other standard fiberglass doors.

EnLiten™ Flush-Glazed Designs

For Classic-Craft®, Fiber-Classic® & Smooth-Star® Doors & Sidelites

Simplified beauty. Resilient designs. At Therma-Tru, we believe your door should always welcome you home – while playing seamlessly into your style. Our EnLiten flush-glazed designs create striking profiles that effortlessly combine indoor and outdoor living spaces, inviting in more natural light than ever. The possibilities are endless, giving you doors that perfectly fit your lifestyle.

Modern-Style Front Entry

Colonial-Style Utility Door

Traditional-Style Patio Doors

Durable by design.

Double-or triple-pane glass is built directly into the door with a high-performance dual adhesive weather seal. This reduces the potential for air and water infiltration, among other benefits.

Superior Sound Dampening

Doors with flush-glazed glass do a better job of dampening outside noise compared to a Lip-lite alternative.

11% More Energy Efficient

The Low-E glass used in flush-glazed doors delivers a clear view and is 11% more energy efficient than 1/2" Low-E glass in a Lip-lite frame.*

Withstands Winds Up to 167 mph

Door systems with flush-glazed glass are designed and tested to withstand wind forces up to 167 mph (DP-50).** (ASTM-E330)

Warranty riders for peace of mind.

EnLiten™ Flush-Glazed Rider for Construction & Installation

Provides protection in case of accidental glass breakage during residential and multi-family construction or installation. Therma-Tru will replace the flush-glazed fiberglass door or sidelite.

EnLiten™ Flush-Glazed Rider for Homeowners

Provides protection in case of glass-related failures due to manufacturer defect. Therma-Tru will furnish \$300 toward installation and replace the flush-glazed fiberglass door or sidelite.

*Comparison of U-factor values of a flush-glazed full-lite door and a Lip-lite full-lite door, both with Low-E glass.

**Must be installed as part of a Therma-Tru door system in compliance with a Therma-Tru product approval. Impact-rated products not available.

Door Construction

Classic-Craft® Premium Entryways

1 Enhanced Weather Resistance

No more worries about rotting, warping or twisting. Classic-Craft premium entryways are tested and designed to resist extreme weather conditions and the damaging effects of moisture. Both the top and bottom of the door are protected by composite rails for a longer-lasting entryway.

2 Solid Security

Classic-Craft premium entryways feel solid and close with authority. A 4" wide beam of engineered lumber runs from the top to the bottom of the locking side of the door to add mass and rigidity, giving the door weight and a natural wood feel.

3 Excellent Durability

Built to stand up to the elements and years of wear, Classic-Craft's fiberglass skins are thicker than other standard fiberglass doors to provide added durability and better long-term performance.

4 Higher R-Values

Classic-Craft premium entryways contribute to an energy-efficient home. A polyurethane foam core provides up to four times the insulating R-Value of wood.*

5 Edge-to-Edge Moisture Protection

Resist moisture at every turn – and along every edge. Classic-Craft premium entryways have hardwood and composite edges that help prevent moisture penetration.

Fiber-Classic® & Smooth-Star® Doors

1 Weather Resistance

Composite rails protect the door at the top and bottom edges to help block moisture that can wick into doors.

2 Security

An enhanced lock block combined with 1-1/4" engineered lumber lock stile increases rigidity and stability.

3 Durability

With very little maintenance, a fiberglass door can bring a home years of durability. Unlike wood, fiberglass will not warp or rot. And, unlike steel, it will not dent or rust.

4 R-Values

Built with a polyurethane foam core that offers up to four times the insulating R-Value of wood*, Therma-Tru fiberglass doors insulate against cold and heat for exceptional energy efficiency.

A Complete Door System

A Therma-Tru® door with genuine Therma-Tru parts is more than just a beautiful door. It's a complete door system – from the glass to the hinges – made to perform as good as it looks.

① Frame Options

We can help you choose the right frame for your door system.

② Removable Weatherstrip

Our resilient design compresses when closed and springs back when open. It's protected by a durable jacket for long-lasting sealing power.

③ Hardware

Choose from beautiful options that will complement the look of your home and help bring you security and peace of mind.

④ Ball-Bearing Hinges

Hinges with ball-bearings protect each hinge pivot, offering added support and stability to help keep your door opening and closing smoothly. Standard on Classic-Craft, Smooth-Star and Steel Doors.

⑤ 7-Shape Corner Seal Pads

(Inswing Only) This innovative design creates a protective air pocket that helps prevent a vacuum from wicking moisture up the weatherstrip.

⑥ Composite Adjustable Sills

These allow flexibility to adjust the sill cap vertically to close gaps, helping to maintain a tight seal between the sill and the bottom of the door.

⑦ Dual-Bulb / Dual-Fin Bottom Sweep

(Inswing Only) Two bulbs compress to sit tight against the sill, while two fins act like walls to form barriers and a built-in rain deflector pushes moisture away.

⑧ Seal-Rite Exact Size Sidelite Units

Mullions not only give the hinges and lock a place to anchor, they come in a range of sizes from 1"-3" in width per mullion to help create an entry door system to fit the opening of your home.

Finish Right at C&L Ward

Leave the work and time of staining or painting your new doors to our finishing craftspeople in our own exclusive prefinish shop. Our complete seven step finishing process will bring out the true beauty of your doors to last years in your home. All you have to do is choose the desired finish. Our design professionals will help select from several different *Sherwin-Williams*® stains and a rainbow of paint colors to provide that one-of-a-kind look for your home.

Why Choose Our Process?

- ✓ When we're done, you're done
- ✓ No odors or fumes in your home
- ✓ No disruption to your daily routine
- ✓ No worries about a mess or spills
- ✓ No excess materials to dispose of
- ✓ No time off work or wasted weekends

Therma-Tru® Door Systems

Independent Laboratory Performance Testing

At the time of manufacture, Therma-Tru exterior door systems (properly assembled with all genuine Therma-Tru components) have been tested under one or more of the following performance specifications: structural load, uniform load deflection, vertical load resistance, air infiltration, water penetration resistance, forced entry resistance, operating forces, force to latch, deglazing resistance, operating cycle performance, impact resistance, sound transmission, thermal performance and solar heat gain performance. Therma-Tru exterior door systems conform to the applicable Performance Standards / Test Methods that may include ANSI/AAMA/NWWDA 101/I.S.2, AAMA/WDMA 101/I.S.2/NAFS, AAMA/WDMA/CSA 101/I.S.2-A440, ASTM E330, ASTM E547, ASTM E283, ASTM E 331, ANSI/BHMA A156.2, ASTM 1304, AAMA 920, AAMA 925, ASTM E2068, ASTM F842, ASTM E987, ASTM E1300, ASTM E90, ASTM E413, ASTM E1332, ASTM E1886, ASTM E1996, PA/TAS 201, PA/TAS 202, PA/TAS 203, HUD UM89, AAMA 1702.2, 24 CFR 3280, 24 CFR 3282, NFRC 100 and NFRC 200. Refer to www.thermatru.com for design pressure and other performance ratings.

Doors

Recommended Door Overhang – For best performance, all doors should be protected by an overhang. The recommended size is half the distance from the base of the door to the bottom of the overhang. So, as an example, a distance of 10' for this dimension would require an overhang of 5' minimum. For wetter climates, southern or western exposures, and for double doors, the overhang should be the same as the distance from the base of the door to the bottom of the overhang. In this same example, the dimension is 10' so the overhang should be 10'.

For best performance, double doors to be used in areas with severe weather exposure must be installed using entry alcoves or large soffit overhangs to protect entry unit from exposure. Multi-point locking systems are highly recommended for 8'0" and double door applications.

Doorlites

Doorlites are insulated, and exposed panes are tempered. Optional wood grilles available for clear doorlites and transoms.

Inserts – All glass (except flush-glazed styles) shall be bedded with glazing mastic and secured in doors with screws. Therma-Tru's SMC and BTS doorlite frames are available for most styles except where noted. SMC and BTS frames shall resist significant deformation by heat up to 200 degrees Fahrenheit, regardless of paint or stain color or placement behind a storm door.

PVC doorlite frames and dividers must be finished within 30 days of installation. Failure to do so will increase the chance for product damage of the type that is not covered by the warranty. PVC doorlite frames and dividers are not recommended for use behind storm doors or to be painted dark colors, if exposed to direct sunlight.

Decorative Glass & Wrought Iron – Each Therma-Tru decorative glass unit is handcrafted by skilled artisans replicating Old World techniques. Each piece is a unique work of art and many things that would appear to be imperfections (small bubbles, lines and waves within the glass) are normal and are part of the Old World charm.

Condensation occurs naturally in the home, caused by excessive humidity in the air. Often this harmless water vapor can be seen collecting on glass surfaces, such as doorlites. Energy-efficient glass units in Therma-Tru door systems are constructed to keep the glass as warm as possible, reducing condensation build-up. However, there is no such thing as a condensation-free window or doorlite in high-humidity conditions.

NOTE: Glass privacy ratings are determined by the 1/2-lite glass size. As a result, the amount of privacy / glass transparency may be more or less than indicated by the privacy rating, based on the glass design and size of the glass that is inserted into the door, sidelite or transom.

Glass designs may differ from depiction due to the size and hand craftsmanship of glass. See your Therma-Tru seller or visit www.thermatru.com for more details.

Components

Adjustable Security Strike Plate – Proprietary adjustable type, permitting in-out adjustment of door in frame, up to 3/16".

Hinges – Minimum hinge size 4" x 4" x .098".

Ball-bearing hinges are recommended for 8'0" doors, doors using heavy lites (e.g., wrought

iron), all 20-Minute Fire-rated fiberglass doors, Impact-rated doors and glass, and all Classic-Craft doors.

Use of the multi-point locking system is highly recommended for 8'0" and double fiberglass doors. Not recommended for steel doors.

Please be aware that single door units built with public access sills have little resistance to water penetration, and double doors built with these sills have a potential to leak if installed exposed to weather. We recommend that units be installed away from weather under large soffits or overhangs.

Use of a sill pan is recommended.

Fiber-Classic and Smooth-Star dentil shelves are not recommended for placement behind storm doors or to be painted dark colors, if exposed to direct sunlight.

Impact-Rated Products

Impact-rated products must be installed as part of a Therma-Tru door system in compliance with a Therma-Tru product approval. Visit www.thermatru.com for product approvals and full details on WBDR- (Wind-Borne Debris Region) / HVHZ- (High Velocity Hurricane Zone) compliant products. Follow weather and news reports in order to assess severe weather situations and obey local authorities' shelter and evacuation orders. No product guarantees safety for persons or property, nor makes any premises hurricane- or impact-proof.

Fire-Rating Performance Standards

Fire and building codes vary throughout the country and acceptance of products and labels is left to the discretion of the local authorities.

MODIFICATION OF PRODUCTS DESCRIBED IN THIS BROCHURE WHICH CARRY FIRE RATINGS (DOORS AND FRAMES) MAY VOID THE FIRE RATINGS.

Test conducted by Intertek, Warnock-Hersey.

Limited Warranties

Please be aware of the applicable Therma-Tru Limited Warranty which contains important restrictions, disclaimers, exclusions and conditions, as well as the below listed Installation, Finishing & Maintenance documents, related to the Therma-Tru product purchased (e.g., Fiberglass, Steel, Patio Door Systems), all of which can be obtained from your Therma-Tru seller or found in their entirety at www.thermatru.com:

- Therma-Tru. Fiberglass and Steel Door Systems Residential Limited Warranty: Fiberglass – Classic-Craft, Fiber-Classic, Smooth-Star, and Pulse. Door Systems; Steel – Pulse, Profiles, Traditions and Therma-Tru. Fire Door (TR 12-24) Steel Edge Door Systems.

- Same-Day. Stain 5-Year Limited Warranty: Same-Day. Stain and Topcoat for Use on Therma-Tru. Fiberglass Door Systems and Fypon. Stainable Polyurethane Products.

Installation, Finishing & Maintenance

Installation, finishing and maintenance must be performed according to Therma-Tru's recommendations to comply with warranty requirements. Obtain a copy of the following documents outlining recommendations from your Therma-Tru seller or find them in their entirety at www.thermatru.com:

- Installation Instructions
- Therma-Tru Fiberglass and Steel Door Systems Recommendations for Proper Finishing and Painting or Staining

NOTE: Finish colors may vary from an actual application due to fluctuations in finishing or the printing of this catalog. See your Therma-Tru seller or visit www.thermatru.com for more details.
